

Step 1: behave -f allure_behave.formatter:AllureFormatter -o reports/features

behave : Run Behave tests

-f allure_behave.formatter:AllureFormatter : Use the Allure formatter (Collects results)

-o reports : save the results to a "reports" folder

features : Run all tests in the "feature" folder

Step 2 :

allure generate reports/ -o allure-report --clean

Step 3 :

View the Report

allure serve reports/features/

Tags/ Markers

#. Tags in Behave are labels you attach to Features and Scenarios to organize and control which tests run.

#. They are incredibly useful for your test suite.
